Technical Skills

Languages:
PHP, JavaScript

Frameworks:
Laravel, Codeigniter, jQuery

Frontend:
HTML, CSS, Tailwind, Bootstrap

Database:
MySQL, MariaDB, PostgreSQL

Tools:
Git, Docker, Composer, Npm, Pest

Cloud/DevOps:
VPS, Linux, Hosting

Concepts:
MVC Architecture, REST API Development, Database Optimization, Authentication & Authorization

Software Engineer with 6+ years of experience building scalable ERP, accounting, and microfinance systems using Laravel and CodeIgniter. Specializes in backend architecture, database design, and performance optimization for applications serving hundreds of real-world users. Beyond hands-on development, contributes to team growth by mentoring 4 junior engineers, leading code reviews for a 5-person team, and fostering a culture of two-way knowledge-sharing — raising code quality and architectural standards while staying open to new ideas from the team.

Experience

Ambala IT Aug 2024 - Present
Software Engineer

- Architected core modules of a Mobile EMI platform (MoMo EMI, Halalflex, OlalaPay) serving 60,000+ customers with 300,000+ installment transactions
- Designed and implemented the device lock/unlock system, including payment-status triggers, overdue tracking, and early-payment handling logic
- Designed and implemented a role-permission management system, alongside Brand and Outlet/Retailer management modules supporting multi-level business operations
- Independently led performance optimization of reporting queries for high-volume transaction data, reducing report generation time from 4 minutes to 30 seconds, and owned job/queue scheduling for automated device actions
- Led backend development of an Educational Institute Management System (Shikkha Plus) serving 3,000+ active users
- Designed and implemented feature sets for a Pre-Recruitment System and Microfinance platform based on defined product requirements
- Mentored 4 junior engineers on Laravel best practices and object-oriented design, while introducing AI-assisted coding workflows to speed up development.

Adova Soft Dec 2022 - Jul 2024
Software Engineer

- Co-designed and built an accounting, inventory, and loan management platform (HishabKitab) from scratch with a 3-person team, covering 15+ modules, including multi-category inventory (raw materials, finished goods, digital products with expiry tracking), services, loans, offers, and payables/receivables
- Developed a POS application adopted by 50+ vendors, processing 180+ transactions per vendor daily (9,000+ transactions/day across the platform)

Engineering Practices

System Design & Architecture

API Design (REST)

Performance Profiling & Query Optimization

File & Database Caching

Queue-Based Job Scheduling

Code Review & Mentoring

Awards

Project Showcasing - 2nd Runner-up
2023-03-04
Sonargaon University

- A cloud-based system: **Project Thesis Manager**.

Experience

Adova Soft Oct 2019 - Nov 2022
Web Developer

- Developed an E-Recruitment System processing 500+ applicants per job posting, featuring a dynamic form builder with configurable questions and validation rules for different job roles
- Built Co-operative Microfinance Management System serving 2,000+ members
- Developed a Smart Prescription System supporting 5 doctors and 300+ patients with appointment scheduling

Education

Sonargaon University B.Sc • CGPA 3.19 (Out of 4)
Computer Science & Engineering 2019-01-10 - 2023-02-16

Bcic College HSC • GPA 3.42 (Out of 5)
Science 2017-07-01 - 2018-12-31

Shere Bangla Nagar Govt. Boys High School
SSC • GPA 4.72 (Out of 5)
Science 2014-01-01 - 2016-12-31

Projects

Mobile Emi

- Designed an automated device lock/unlock workflow: scheduled unlocks for verified payments, manual override for support/edge cases, and integration with a device management approach
- Built overdue and early-payment logic including outstanding balance calculation and due-date monitoring across variable payment schedules (3–6 months)
- Optimized reporting queries for 300,000+ transaction records, reducing 4 minutes to 30 seconds
- Implemented queue-based job scheduling for automated device actions (lock/unlock/enroll) at scale

Shikkha Plus

- Educational Institute Management System
- Manager: Pre-Admission, Admission, Promotion Process
- Fees Management Process, Monthly Fees, One-Time Fees
- Fine Management, Waiver Management
- Attendance Management, Group Management
- Exam Management, Seat Plan Management, Result Management, Promotion Management

Managing Director, Adova Soft

Projects

HishabKitab (ERP System)

- Developed inventory and accounting modules for multi-company operations
- Implemented a ledger, balance sheet, and transaction logging system
- Performed code reviews and maintained documentation

E-Recruitment System

- Developed a recruitment platform with Applicant, Admin, and Verifier panels
- Implemented dynamic form generation based on job designation
- Built a role-based access control system

ZindaPark Banking System

- Developed an online banking system with financial year-end closing features.
- Implemented interest calculation and financial processing modules.
- Optimized system performance for low-bandwidth environments.
- Designed queue-based task scheduling.
